

Portfolio

An online portfolio to gain exposure, showcase the skills that I have developed, and projects I have done.

This website is meant to be a place where I can refer people to look at my work. My work would include photos that I have taken, experiences I have, videos I have shot, photo's and video's that I have edited, projects I have lead, graphics that I have created, along with a resume. The goal of this is to be a professional resource I can utilize as I go out and apply for more internships and jobs in the coming years. Not only should the contents of the website show the skills I have learned at Michigan State, but the website should show my knowledge in computer technology and web interface.

Visitors

Recruiters/ HR People

Professionals looking for a new person to join their company/team.

College kids in my major

Future co-workers that want to see what I can do.

Peers/friends/ family

People who will want to check in and see what I've been up to.
